Modular Bar Fixture Kit

Part Number: 11794969

This modular fixture kit is designed to offer introductory HALT fixturing for a multitude of applications. This fixture kit provides for the mounting of most assembly level products from power supplies to servers. The extruded bars can be used to span most products under test and are machined with slots for optimal mounting flexibility. The bars are used to clamp the product to the table. The kit includes:

Quantity	Item	Details
4	3/8-16 X 14" Threaded Rod	Mounts to most HALT/HASS vibration tables
4	3/8-16 X 23" Threaded Rod	Mounts to most HALT/HASS vibration tables
4	1" X 2" X 20" Extruded Aluminum	Lightweight, stiff, low thermal mass, spans holes from 15"-19" apart, slots allow multiple mounting positions
4	1" X 2" X 10" Extruded Aluminum	Lightweight, stiff, low thermal mass, spans holes from 5"-9" apart, slots allow multiple mounting positions
4	Quick Knobs	Allow user to slide knob over threaded rod until engagement and then tighten for quick installation
4	3/8-16 Split Lock Nuts	Allow user to install nut over threaded rod at engagement and then tighten for quick installation
4	Angle Brackets	Allow user to customize assembly of extruded aluminum to optimize kit
8	1/4-20 T-Nuts	Used in conjunction with angle brackets and extruded aluminum
8	1/4-20 BHSCS	Used in conjunction with angle brackets and extruded aluminum
8	3/8 Flat Washers	Used to ensure surface area contact while tightening with knobs or nuts
8	3/8-16 Hex Nuts	Used to tighten fixture bars over product when a specific torque is required or Knobs/split nuts do not apply enough torque
